

# CRIMSON 2 TUTORIAL

TU0025

## Title: CompactFlash

### DESCRIPTION

Not only does the CompactFlash interface provide expandable storage for data and event logging, it also provides a means to load the panel's database without a PC.

### BENEFITS

- Use the memory card as a drive on your G3 and save any process data you want.
- Easily accessible using USB connection or FTP synchronization.
- Provide virtually unlimited memory for you reports, recipes, data, events and security logs.
- Simple program transfer from one G3 to another using the CompactFlash to download.

### EXAMPLE

A production manager in a bakery can access packaging line summary reports on his server for production numbers and shipping results. The reports are generated by G3s that synchronize with the server on a regular basis.

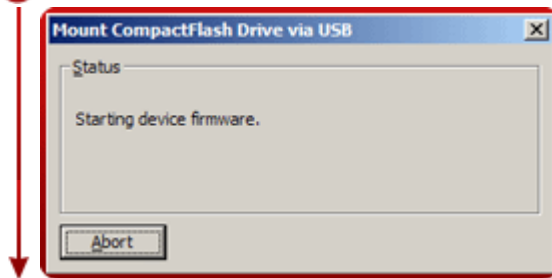

# USING C2 COMPACTFLASH TOOLS

## Mounting the CompactFlash Card

**Step 1** Click on Link>Mount Flash,

**Step 2** The G3 will cycle power to mount the card,

**Step 3** The card is then available as a drive under Windows Explorer,

## Saving an image on the card

**Step 4** Click File>Save Image,

**Step 5** Select the CompactFlash Card and name the file DBASE.cdi,

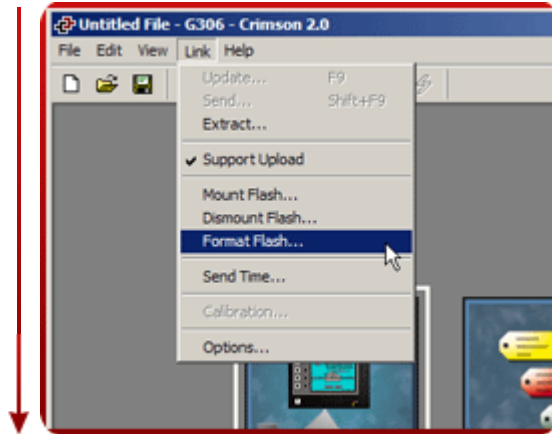

**Step 6** Click Yes to support upload,

Tutorials continues next page.

## Formatting the CompactFlash Card.

**Step 7** Click on Link>Format Flash

## Dismounting the CompactFlash card.

**Step 10** Click Link>Dismount Flash,

**Step 8** Crimson 2.0 will require confirmation,

CompactFlash setup complete!

**Step 9** The Formatting window will stay until the CompactFlash is formatted,
